Seed lot described as : Common oat Archer
Seed lot marks : AUS/W/25PS204

Laboratory sample no.: 25/638
Date of sampling : 03-Dec-2024
Date sample received : 16-Dec-2024
Date test concluded : 02-Jan-2025

Number of containers

1 x 30,000 kg

ANALYSIS RESULTS

Species : Avena sativa

Common Name : Common oat

Synonym/s :

PURITY - % Weight			GERMINATION - % Number					
Pure Seeds	Inert Matter	Other Seeds	Days	Normal Seedlings	Hard Seeds	Fresh Seeds	Abnormal Seedlings	Dead Seeds
100.0	Trace	0.0	11	97	0	0	3	0
Between paper 20 degrees C. Prechilled for 4 days at 5 degrees C before germination.								

INERT MATTER : Plant material.
Chaff.

REMARKS: COMPLETE TEST: The whole working sample has been examined for all other seeds present, except for dust-like seeds such as Orobanche and Striga species.

This sample was tested by Seed Services Australia. ISTA accredited laboratory (AUDL01).

The working sample weight examined for other seeds = 1000.0g. No "other seeds" were found in this weight.

ANALYSIS RESULTS OF UNCERTIFIED SEED RELATE ONLY TO SAMPLES AS RECEIVED.
